

# Super Mosstox<sup>®</sup>

## Technical Information

**SUPER MOSSTOX<sup>®</sup> is a surface biocide and mosskiller containing dichlorophen for the control of mosses in turf or on external hard surfaces. Contains 360 g/L (30.0% w/w) dichlorophen.**

SUPER MOSSTOX<sup>®</sup> controls moss on external hard surfaces such as footpaths, tennis courts, play areas and roofs. At the recommended rate it will also control the fungus disease Red Thread.

### Application Rate

Use 500 ml of SUPER MOSSTOX<sup>®</sup> in a volume of 10 litres of water to treat 100 m<sup>2</sup>. This is equivalent to 50 litres of SUPER MOSSTOX<sup>®</sup> per hectare. Thorough wetting of the moss is essential.

External hard surfaces: Use 170 ml of SUPER MOSSTOX<sup>®</sup> in a volume of 10 litres of water to treat 100 m<sup>2</sup>. This is equivalent to 17 litres of SUPER MOSSTOX<sup>®</sup> per hectare.

### Recommended Nozzles

'Lurmark' Moss Green Flat Fan 08-F110 for power sprayers.  
Moss Green Flat Fan 08-F110 or Moss Green Anvil AN4 for knapsack sprayers.

### Preparation of Spray

SHAKE WELL BEFORE USE

Mix the required quantity of SUPER MOSSTOX<sup>®</sup> with sufficient clean water to give uniform coverage of the ground according to the application method used.

### Spraying Machine

Use 50 L or 17 L SUPER MOSSTOX<sup>®</sup> in 600 - 1000 litres water per ha.

### Knapsack Sprayer

Use 500 ml or 170 ml of SUPER MOSSTOX<sup>®</sup> in 10 litres water to treat 100 m<sup>2</sup>.

### Watering Can

Use 50 ml or 17 ml of SUPER MOSSTOX<sup>®</sup> in 9 litres of water to treat 10 m<sup>2</sup>. Use a fine rose.

# Super Mosstox<sup>®</sup> Technical Information

## Timing

SUPER MOSSTOX<sup>®</sup> may be used within the period of Spring to Autumn. Do not attempt to treat moss during freezing or frosty conditions, nor during a drought.

**Note:** SUPER MOSSTOX<sup>®</sup> works through contact action and needs a thorough wetting. Therefore it is important to adhere to the recommended water volumes. To achieve lasting control, the treatment of areas with SUPER MOSSTOX<sup>®</sup> should be supplemented with appropriate measures to improve soil fertility, drainage, aeration or reduction of shade as required.

Grass should preferably be cut for 3 days before treatment and not again until 4 days after. Scarify vigorously 2-3 weeks after treatment to remove dead moss.

## Cautions

AVOID spray drift onto flower borders or plants. Wash equipment thoroughly immediately after use.

DO NOT SPRAY in conditions where drift may affect the public.

DO NOT APPLY when rain is imminent.

IRRITATING TO EYES AND SKIN

PROTECT FROM FROST

READ ALL PRECAUTIONS BEFORE USE. (MAPP 09942)

PACK COVERAGE: 5 LITRES COVERS 1,000 m<sup>2</sup>
